SUMMARY

Engineering leader with 10+ years building and shipping consumer-scale generative-AI products at Microsoft. **Youngest Partner ever appointed at Microsoft China** (Partner Group Manager — Microsoft's Director-equivalent level). Currently leading AI for **Microsoft Edge** (a browser used by **169M DAU**) and **Office Agent** (Microsoft 365 Copilot, codename "Societas") — owning a cross-geo org of **60+ engineers and applied scientists** across Redmond, Beijing, and Suzhou that I **built from zero into an AI-native team. Manager of managers since 2022 (3+ yrs); 10 yrs total people-management; current span: 3 line-managers / 60+ ICs across 3 sites.** Most recently shipped **Office Agent**, a multi-agent system that produces polished PowerPoint, Word, and (next) Excel artifacts end-to-end and reached **state-of-the-art on the public GAIA benchmark**, ahead of Manus, Genspark, and OpenAI Deep Research. Previously turned Edge into an **AI-first browser** globally — Edge Copilot (Chat DAU **3M, 10× lift**), Windows Copilot, Edge Actions, and on-device transformer models shipped to **69 languages, 154+ regions, 4M peak DAU**. Earlier scaled Bing QnA from English-only to **100+ languages, 200+ regions**, powering billions of consumer queries. Two-time Microsoft **MLADS Distinguished Contribution Award** (top 2 / 300, record-breaking). 50+ peer-reviewed publications · 9.5K+ citations · 25+ U.S./CN patents.

Expertise: generative AI for consumer products · multi-agent systems & AI agents · multimodal understanding (long-doc, video, screen) & visual composition · Copilot, browser, on-device intelligence · search, ranking, Q&A, recommendation · large-scale ML platform · globalization · 0→1 incubation and global scaling.

SELECTED HIGHLIGHTS

- **Consumer reach across flagship surfaces:** AI lead for **Microsoft Edge — 169M DAU browser**; on-device Edge transformers shipped to **69 languages, 154+ regions, 4M peak DAU**; Edge Copilot Chat DAU grew **10× to 3M**; Bing QnA scaled to **100+ languages, 200+ regions** powering billions of consumer queries.
- **Frontier multi-agent generation:** Office Agent — **state-of-the-art on the public GAIA benchmark** (L1 88.7 / L2 76.7 / L3 60.0), ahead of Genspark, Manus, and OpenAI Deep Research. Pioneered **Taste-Driven Development** with auto-theming, self-verification, and iterative refinement; output as HTML5 with native PowerPoint conversion.
- **0→1 in 8 weeks, AI-native execution:** went from concept to SOTA Office Agent with a **7-person team in 8 weeks**, using AI-native engineering practices (95%+ AI-generated and AI-reviewed code) — a model for shipping at the frontier with small high-leverage teams.
- **Multimodal & visual composition:** shipped **video Copilot** (chat with any video), **screen understanding via screenshot** for Windows Copilot, **contextual chat over 1000+ page documents at 95%+ accuracy, auto-theming & HTML5 slide synthesis** in Office Agent, and a **400-billion-vector ANN search** over the Bing web index.
- **Org & cross-functional leadership:** **built the Edge ML org from zero** into a **60+-person AI-native team across 3 sites**; hired the first 50+ engineers and applied scientists, established the engineering culture, and grew 3 line-managers from within. Routine partnership with PM, UX, Data Science, and Research across Edge, Windows, Office, and Bing. **16 positive partner feedbacks** from VP/Partner/Principal-level stakeholders in FY21 alone.
- **Recognition:** **youngest Partner ever appointed at Microsoft China** (Partner is Microsoft's Director-equivalent level). Two-time **Microsoft MLADS Distinguished Contribution Award** (top 2 / 300; first person to win in two consecutive conferences). Edge Copilot publicly recognized by Satya Nadella as a top agentic experience. NeuronBlocks open-source NLP toolkit — **1k+ GitHub stars in 2 months**.

EXPERIENCE

Microsoft — Edge ML & Societas ML, Redmond <i>Partner Group Manager (M-of-M; 60+ extended org across Redmond / Beijing / Suzhou)</i>	2025 – Present
Microsoft — Edge Machine Learning, China <i>Principal Group Manager (M-of-M; multi-team across Beijing & Suzhou)</i>	2022 – 2025
Microsoft — Bing Search, STCA	2015 – 2022

SELECTED PROJECTS & IMPACT

Office Agent — Microsoft 365 Copilot (codename "Societas")

2025 – Present

Societas ML, Microsoft Redmond — Global AI Lead

- **Charter & ownership:** built a **multi-agent system** that delivers polished PowerPoint, ready-to-use Word, and (next) Excel artifacts end-to-end. Single owner of technical strategy, architecture, evaluation, and delivery.
- **Architecture:** central **planner** agent + **specialized agents** (code, finance, search) running in parallel over a **secure, sandboxed tool layer**; **code-first design** (the model writes and executes code over task-specific tools) for cross-domain generalization.
- **Taste-Driven Development:** distilled "**taste blueprints**" from in-house high-quality samples; built **auto-theming** (theme generated from content rather than picked from templates) and a **self-verification + iterative refinement** loop; rendered as HTML5 with a converter to native PowerPoint.
- **Benchmarks:** **GAIA L1 88.7 / L2 76.7 / L3 60.0** — ahead of Genspark (87.8/72.7/58.8), Manus (86.5/70.1/57.7), and OpenAI Deep Research (74.3/69.1/42.3). Defined the in-house **TDDEval** benchmark (Content Quality + Taste Score).
- **Execution:** 0→SOTA with a 7-person AI-native team in **8 weeks**; 95%+ AI-generated and AI-reviewed code. [Microsoft Tech Community blog](#).

AI for Microsoft Edge — Turning a 169M-DAU Browser into an AI-First Product

2022 – 2025

Edge ML, Microsoft — Global AI Lead

- **Scope:** as the global AI lead for Microsoft Edge (**169M DAU**), **built the Edge ML organization from zero** into a 60+-person AI-native team across Redmond, Beijing, and Suzhou — owned hiring, org design, and the engineering culture; promoted 3 line-managers from within. Drove technical strategy and execution across Copilot, agents, and on-device intelligence.
- **Copilot in Edge (2023–2024):** owned the algorithm and feature stack for (1) contextual chat over any in-browser document, (2) **video Copilot** — chat with any video, (3) **Edge Actions** for end-to-end task completion, and (4) **personal Copilot** over browsing history. Result: **Chat DAU 3M (10× lift)**; contextual chat over **1000+ page documents at 95%+ accuracy**; recognized by Satya Nadella as a top agentic experience.
- **Copilot in Windows (2023–2024):** Edge team joined forces with Windows; my team owned back-end and algorithm for the first Windows Copilot release, plus Windows Skills (on top of my Edge Action framework), contextual chat, and **screen understanding via screenshot**.
- **Edge Client Intelligence — On-device transformers (2022–2023):** developed extreme model compression (distillation, quantization) to ship a family of on-device transformer models — **DeepEE, DeepPU, DeepAutoFill, DeepUU** — with privacy and COGS savings.
 - **DeepEE:** first client universal transformer in Edge (P/R > 95) shipped to **69 languages, 154+ regions worldwide; 4M peak DAU**.
 - **DeepPU:** 6+ scenarios — shoreline personalization, 1CNS personalized notifications, contextual prompt suggestions, shopping PDP triggering, tab group auto-naming & auto-grouping.
 - **DeepUU:** client user-profile model in global markets — **BSoM proxy +0.79% (abs), +2% (rel)**.

Document Understanding for the 400B-Document Bing Web Index

2019 – 2022

Document Understanding Team, WebXT, Microsoft

- Led the STCA DU team (16 engineers/scientists) building the document-understanding DNN platform for search and recommendation.
- **Universal Multi-modal Information Extraction** powering 15+ production scenarios — Caption, QnA, Ads, Recommendation; extended to fine-grained extraction (product name, price, manufacturer, image).
- **Universal Topic Understanding** (100k topics) powering 15+ scenarios — Sage News, Windows Feeds (50+ regions), Underside, Enterprise News, Bing QnA, PAA.
- SOTA full-body representation model (**FBV**) — **400-billion-vector ANN search** over the Bing web index.
- Long-document MRC across 100+ languages, powering 8+ scenarios — Azure, QnA, PAA, MSN News, Knowledge Card.
- Authority models (topical authority, host embedding) powering Bing QnA, PAA, core relevance, spam detection, personalized search.

Recommendation Algorithms for Feeds

2020

ASK & DU Team, Bing, Microsoft

- **QnA Feeds:** tech lead — built streaming index gen and 3-layer ranking + two-tower embedding from scratch.
- **News Recommendation:** topic/KPE-based personalized recall and topic-based diversity for the first Windows Feeds release across 50+ regions.
- **Web Recommendation:** tech lead for FBV semantic recall — **+21 points recall@100**.
- **Movie Recommendation:** knowledge-graph-enhanced collaborative filtering — **+10 points**.

Bing QnA Universalization to Global Regions

2019 – 2020

ASK Team, Bing, Microsoft

- Tech lead — scaled QnA from English-only to **100+ languages and 200+ regions** for the first time.
- Proposed a systematic **language-scaling methodology** for low-resource languages — **2× MLADS Distinguished Contribution Award (top 2 / 300, record-breaking)**.
- Designed and built a brand-new universal streaming QnA pipeline — refresh cycle **1 month → minutes/seconds; 80% GPU-capacity savings**.

Deep Learning for Bing QnA

2017 – 2019

Quantus Team, Bing, Microsoft

- Shipped 10+ DNN releases that retired the legacy GBDT ranker (400+ hand-crafted features) for the first time and won WPSBS vs. Google.
- DNN-powered full-stack list-QnA ranking pipeline — 10+ releases contributing **+20 precision points** to beat Google.
- Novel model compression for heavy pre-trained model online serving — powered the **first BERT model deployed in Bing** within 1 month of open-source — **+3.0% coverage, +5.0% precision**.
- Open-sourced **NeuronBlocks** NLP DNN toolkit — **1k+ GitHub stars in 2 months**.

Bing News & Tweet Core Ranking

2015 – 2016

News Team, Bing, Microsoft

- Shipped dozens of ranker releases in Bing News and News homepage ranking; ML-based Tweets ranker — Twitter answer defect rate **18% → 2%**; minute-level breaking-news detection (US patent filed); Rich Nav news feature on Bing — 2.73 strong surplus, 19.17 weak surplus.

EDUCATION

Institute of Computing Technology, Chinese Academy of Sciences

2012 – 2015

M.S., Computer Science (Honored Graduate)

Shanghai University

2008 – 2012

B.S., Mathematics (Top 1 / 297, four consecutive years)

PUBLICATIONS, PATENTS & RECOGNITION

- **50+ peer-reviewed publications & 9,500+ citations** (ACL, EMNLP, NAACL, SIGIR, KDD, WWW, WSDM, COLING, ICASSP) — full list on [Google Scholar](#). Selected: *Mining Implicit Relevance Feedback from User Behavior for Web Question Answering* (KDD 2020); *Model Compression with Two-stage Multi-teacher Knowledge Distillation* (WSDM 2020); *Cross-lingual Machine Reading Comprehension with Language Branch Knowledge Distillation* (COLING 2020); *Unicoder: A Universal Language Encoder via Multi-task Cross-lingual Pre-training* (EMNLP/IJCNLP 2019); *NeuronBlocks: Building Your NLP DNN Models Like Playing Lego* (EMNLP/IJCNLP 2019); *Language Scaling: Applications, Challenges and Approaches* (KDD Tutorial 2021); *Scaling out NLP Applications to 100+ Languages* (WWW Tutorial 2021).
- **25+ granted U.S. / CN patents** across model compression, cross-lingual representation, on-device entity extraction (DeepEE), graph-enhanced collaborative filtering, sequential / cross-domain recommendation, intelligent tab activeness, split-screen viewing, knowledge distillation, and event detection.
- **Two-time Microsoft MLADS Distinguished Contribution Award** (Spring 2021 & Fall 2021; top 2 / 300+; first person in history to win in two consecutive conferences). **Youngest Partner ever appointed at Microsoft China** (Partner = Director-equivalent level at Microsoft). Multiple Microsoft Hackathon Outstanding Project Awards (2024). Microsoft AI Core Q3

FY18 Greatness Award. Excellent Student of CAS (Top 5%, 2013); Honored Graduate of Shanghai (Top 1%, 2012); National Scholarship (Top 1%, 2011).
